PROFESSIONAL SUMMARY

Data Scientist and AI/ML Engineer with 1+ year of production experience building end-to-end ML pipelines, LLM-powered agentic workflows, and real-time inference APIs on AWS. Skilled in NLP, deep learning, RAG systems, and MLOps — delivering scalable, low-latency AI solutions across the full ML lifecycle from feature engineering to CI/CD deployment.

EXPERIENCE

- Data Scientist** *Python, Scikit-Learn, XGBoost, Pandas, NumPy, FastAPI, AWS EC2, MLflow, DVC, NLP, Matplotlib, Seaborn*
PropFTX Jan 2025 – Jan 2026
 - Designed and deployed a production-grade **ML-based property valuation model** achieving **90% prediction accuracy**, enhancing investor decision-making and reducing manual analyst review time by **60%**.
 - Architected a **hybrid forecasting pipeline** (gradient-boosted ML + CAGR) with **NLP sentiment analysis** on market reports, increasing recommendation relevance by **20%**.
 - Implemented **CI/CD pipelines** with **MLflow** experiment tracking and **DVC** versioning for reproducible, auditable model deployments across staging and production.
 - Deployed a **FastAPI REST ML inference service** on **AWS EC2** delivering real-time predictions at sub-100ms latency for live platform users.
- Data Science Intern** *Python, Selenium, BeautifulSoup, Pandas, NumPy, Scikit-Learn, Matplotlib*
PropFTX Sep 2024 – Dec 2024
 - Engineered large-scale **ETL and web scraping pipelines** automating collection of **50,000+ property listings**, cutting data acquisition time by **95%**.
 - Prototyped an **NLP-driven recommendation engine** (TF-IDF + cosine similarity) later scaled into a full **production-ready system** during the full-time role.

SKILLS

- Programming Languages & Databases:** Python, Java, SQL, MySQL, Firestore
- Machine Learning & Deep Learning:** Scikit-Learn, TensorFlow, Keras, XGBoost, Pandas, NumPy, Matplotlib, Seaborn
- NLP & Generative AI:** NLP, LLMs, Prompt Engineering, RAG, LangChain, Google Gemini Pro, Agentic Workflows, Workflow Orchestration
- MLOps & Cloud:** AWS (EC2, SageMaker, S3, RDS), Docker, MLflow, DVC, CI/CD, Git
- APIs & Developer Tools:** FastAPI, Flask, Streamlit, REST APIs, Gmail API, Postman, Selenium, BeautifulSoup

PROJECTS

- AI-Powered Supply Chain Management System**
FastAPI, SQLAlchemy, Python, AWS EC2, Docker, REST API
 - Built a **production-grade FMCG Distribution Management System** on **AWS EC2** with Docker, optimizing multi-warehouse inventory routing across complex supply chain networks.
 - Developed a modular **FastAPI + SQLAlchemy** backend with **AI-driven analytics reporting**, reducing manual distribution reporting effort by **40%**.
- Agentic AI-Powered Email Automation System**
Python, LangChain, LLM (Google Gemini Pro), RAG, NLP, Gmail API, Pandas
 - Deployed an **Agentic AI workflow** using **LangChain Agents** and **Gemini Pro LLM** to autonomously parse, classify, and respond to emails via **Gmail API** with zero human intervention.
 - Integrated **RAG** for context-grounded replies; reduced email triaging by **85%** and cut average response time by **90%** through dynamic entity extraction and intent classification.
- Neural Network Engine from Scratch**
Python, NumPy
 - Built a fully custom **deep learning framework** in pure Python/NumPy — dense layers, ReLU/Sigmoid activations, **backpropagation**, and **gradient descent** — with no ML library dependency.
 - Validated on the Iris dataset, achieving **90% test accuracy**, demonstrating deep foundational understanding of neural network optimization.

CERTIFICATIONS

- Machine Learning Course – Infosys Springboard
- Machine Learning Foundations – LinkedIn Learning
- C Programming Basics

EDUCATION

- Jain University**
Bachelor of Computer Applications – Specialization in Artificial Intelligence
 - CGPA: **8.75 / 10**

Aug 2022 – Apr 2025
Bengaluru, India
